教育方法等						
概要	What conditions are needed to become a global leader? In this lesson, you will be able to check your results in TOEIC format on the business English you have learnt through cases dealing with important events related to global leaders. You will think about how to make the decisions and commitments necessary for a leader through simulated experience. The class will focus on speaking and listening, learning basic and practical communication skills in understanding and explaining what they have experienced with a fair level of adequacy, fluency.					
授業の進め方・方法	Students are given opportunities to explore the types of English in technical situations. The ability to hear the different sounds within words is essential to reading and writing successfully. Sound Sense provides suggestions for how you can support students in developing and applying understandings about sounds, letters, and words when reading and writing. Students are required to bring a English/Japanese-Japanese/English dictionary. Positive participation is highly evaluated.					
注意点	Please follow the lesson plan for this class and do preparatory work (look up any unknown words or phrases in the dictionary) and review (reconfirm the content of the lesson by rereading the English sentences completed in class / check important words and phrases, etc.). In addition, independent study is required for each lesson. Be sure to work on the preparatory tasks supported in class. Students who miss regular assignments will be given a mark of zero. Make sure of your lesson time and the place before your attendance.
