Assigned Department Objectives							
Teaching Method							
Outline		In this course, the students will acquire knowledge about traditional Japanese architecture, western architecture and modern architecture. The course aims to present the style and spatial characteristics of Japanese architecture from ancient times to modern times. It will analyze each style of traditional Japanese architecture and its relation to the social and cultural background characteristics and historical changes of each period.					
Style		Slide lectures on Japanese traditional architectural history and field trips.					
Notice		The students must read the textbook and handle a report about the content read before each class. Students who miss 1/4 or more of classes will not be eligible for evaluation.
