教育方法等							
概要		In order to understand spoken and written English and to express themselves confidently, accurately, and fluently, students will observe English and practice it.					
授業の進め方・方法		The basic format of a lesson starts with a dialog which students listen to, read, and then practice with a partner. This is followed by some vocabulary building. Students then practice the new vocabulary by reading semi-controlled dialogs with a partner. Following this is less controlled conversation practice. The second part of the lesson starts with a listening activity followed by another chance for students to acquire new vocabulary. Students will then have a chance to speak again using the new vocabulary either in pairs or groups. The final exercise is a reading exercise which varies from reading for detail to scanning for information.					
注意点		Students are expected to participate enthusiastically in class activities.
