Akashi College		Year	Year 2022			ourse Title	Manufacturing Engineering I		
Course	Informa	tion							
Course Co	ode	4220			Course Catego	ory Specialized		d / Compulsory	
Class Format Lectu		Lecture	re		Credits	School Cre		edit: 1	
Department Mech		Mechanica	nical Engineering		Student Grade	e 2nd			
Term First Ser			nester		Classes per We	Week 2			
Textbook Teaching	and/or Materials								
Instructor KATOH Takahiro									
Course	Objectiv	'es							
2. Unders	stand the b stand the b	pasics of cast pasics of plas	ing and can cho tic working and	ose the best desig	gn and machining est design and m	g methonachinin	od for a v g metho	vorkpiece. d for a workpiece.	
Rubric									
			Ideal Level		Standard Level			Unacceptable Level	
Achievem	ent 1		Can establish a method for manufacturing products by casting.		Can explain the various casting methods.		s casting	Cannot explain the various casting methods.	
Achievement 2			Can establish a method for manufacturing plastic working.		Can explain the working metho	Can explain the various plastic working methods.		Cannot explain the various plastic working methods.	
Assigne	d Depar	tment Obj	ectives						
Teachin	g Metho	od							
Can explain how to make castings, the requirements, structure and types of the molds. Can explain how to make castings in precision casting, die casting and other casting methods. Can explain the defects of castings. Can explain the characteristics of plastic working (forging, rolling, pressing, and other plastic wormethods).								r casting methods.	
Style		Classes w	ill be held in a le	cture style, and tl	here will be exer	cises ar	nd assign	ments.	
Notice		memorize	e it.	review what they longer more of classes w	,			content of the lecture, not simply	
Charact	eristics		Division in Le		Will flot be eligible	<u> </u>	<u> </u>	, adc.	
		oi Ciass /			Ι	_		☐ Instructor Professionally	
☐ Active	Learning		☐ Aided by IC	T	☑ Applicable t	o Remo	te Class	Experienced	
Course	Plan								
		Т	Theme (Goals				
	1st Quarter		Outline of casting, and models (model type, and model material)			Learn about casting and models.			
						Learn about sand molds, shell molds, special molds, and molds.			
1st Semeste r			casting if (casting method, and forming machine)			Learn about casting plans and mold-building machines.			
		fi	furnace, and reverberatory furnace)				Learn about cupola, electric furnace, crucible furnace and reverberatory furnace.		
			(defects, and inspection methods)			Learn about the defects and inspection methods of castings.			
		a a	alloy, and light alloy)			Learn about cast iron, cast steel, copper alloy, and light alloy.			
		7th c	Special casting method I (die casting, centrifugal casting method, vacuum degassing method, and continuous casting method)			Learn about die casting, centrifugal casting, vacuum degassing, and continuous casting.			
			Summary, Midterm exam						
	2nd Quarter	9th C	Overview of plactic working (What is plactic			Learn a	Learn about plastic working and its outline.		
		10th F	Forging I (What is forging; hot forging, cold forging, free forging, and mold forging)			Learn about the features of forging, hot and cold forging, free forging, and mold forging.			
		11tti n	materials)			Learn about forging machinery and materials for forging.			
		12th s	steel, deforming of material, and deforming of			Learn about rolling, rolling machines, rolling of steel, deforming of materials, and deforming of rolls.			
		13th P				Learn about the outline of press and its characteristics.			
						Learn about the types of press processing and press machines.			
		15th n	molding, discharge molding, electromagnetic molding, and high-speed forging), Summary			Learn about explosion molding, discharge molding, electromagnetic molding, and high-speed forging.			
			Final exam						
Evaluat	ion Meth	nod and W	eight (%)						

	Examination	Report	Attendance • Behavior • Presentation	Total
Subtotal	60	30	10	100
Basic Proficiency	0	0	0	0
Specialized Proficiency	60	30	10	100
Cross Area Proficiency	0	0	0	0
